Faizan Ali

Full Stack Software Engineer

faizanalyhh@gmail.com | +92-3095590082 | linkedin.com/in/faizan-ali-3b3b15219

Professional Summary

Computer Science graduate and Full Stack Software Engineer with hands-on experience building Django web applications, including chat, blog and weather apps, using Python, Django, HTML, CSS, SQL and Git. Experienced in secure authentication, database-backed messaging, CRUD features, third-party API integration, debugging and Git/GitHub workflows. Also brings a background in data engineering and business intelligence, including ETL pipelines on AWS, Azure, Apache Spark and Databricks, and Tableau dashboards. Strong interest in building reliable, user-focused software from frontend to backend.

Education

Capital University of Science & Technology, Islamabad, Pakistan

B.S. in Computer Science, graduated Sep 2024

- **Concentrations:** Full Stack Software Engineer, Data Engineering, Business Intelligence Developer
- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Assembly Programming, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Statistics

Experience

Full Stack Engineer, Self-Employed | Remote

Mar 2026 – Present

- Built Django chat, blog and weather applications.
- Implemented secure authentication, database-backed messaging, blog posts, comments, likes and rich-text editing.
- Integrated the OpenWeatherMap API.

- Troubleshot migrations, model relationships, templates, routing and CSRF issues.
- Managed changes with Git and GitHub.

Business Intelligence Developer, Self-Employed | Pakistan

Sep 2025 – Feb 2026

- Developed interactive Tableau dashboards and reports.
- Analyzed and transformed data with SQL and Tableau.
- Built KPI, healthcare and revenue visualizations to support data-driven decisions while maintaining data accuracy and performance.

Data Engineer, Freelance | Pakistan

Jan 2025 – Aug 2025

- Built end-to-end data engineering projects and ETL pipelines for ingestion, transformation and analytics using AWS, Azure, Apache Spark and Databricks.
- Carried out exploratory data analysis and developed dashboards.
- Documented projects on GitHub.

Website Developer Intern, CyberX Studio | Islamabad, Pakistan (On-site)

Aug 2023 – Sep 2023

- Built responsive, user-friendly websites with HTML, CSS and JavaScript.
- Collaborated with SEO and content teams.
- Gained exposure to AWS S3 and EC2, and to data workflows using Apache Spark and SQL.

Student Volunteer, RAHMA Islamic Relief | Islamabad, Pakistan (On-site)

Feb 2023 – Mar 2023

- Volunteered as a primary-school teacher, supporting students through hands-on teaching and contributing to the local community.

Projects

Django Blog Application | Full Stack Web Application

- Built a Django blog with CRUD functionality, database models, comments, likes, authentication, rich-text editing and dynamic templates.

- Implemented Django ORM, migrations, forms, CSRF protection, validation and template-based frontend rendering.
- Used Git and GitHub with feature branches, commits, merges and a structured development workflow.
- Debugged database, routing, template, authentication and form-related issues.

Django Chat Application | Full Stack Web Application

- Built a chat application with secure authentication and database-backed messaging.
- Worked through model relationships, migrations, templates and routing.

Django Weather Application | Full Stack Web Application

- Developed a weather application using Python and Django, integrating the OpenWeatherMap API.
- Implemented API requests, city-based weather search, error handling and dynamic results.
- Worked with HTML, CSS, Django templates and backend logic to deliver an end-to-end web application.

Secure Sphere: AI-Powered Home Security System | Final Year Project

- Developed a smart home security solution integrating face detection and logging to track visitors.
- Implemented intruder detection to alert homeowners instantly of unauthorized access.
- Used computer vision and real-time notifications to enhance home security.

Skills

- **Programming:** Python, C++, SQL, HTML, CSS, JavaScript
- **Frameworks:** Django
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Data & Cloud:** AWS, Azure, Apache Spark, Databricks, Tableau
- **Tools:** Git, GitHub, Visual Studio Code, PyCharm, Docker

Certificates

- Specialization certificate of Data Engineering (Coursera)

- Tableau A-Z: Hands-On Tableau Training for Data Science
- Crash Course on Python (Coursera)
- The Complete Python Bootcamp from Zero to Hero in Python (Udemy)
- SQL Basic certificate (HackerRank)
- C++ Programming: Beginning to Beyond (Udemy)
- Amazon Trading (CUST)
- Microsoft Excel Mania Training
- Service Learning and Community Engagement, George Washington Pre-College Program, Washington DC (USA)
